Managing Director
KeySoft Ltd

Dear Sir/Madam,

RE: Request for Industrial Attachment opportunity for our final year students

IPRC Tumba is a technical high-learning institution that offers technical training in different programs of study, namely Renewable Energy, Electronics and Telecommunication, Information Technology, and Mechatronics.

IPRC TUMBA aspires to be an effective contributor within the TVET section and life-long learning framework. The very intention behind the training is to develop a professional well-skilled workforce responsive to the country's needs, the regional and international labor market for self-employment and job creation;

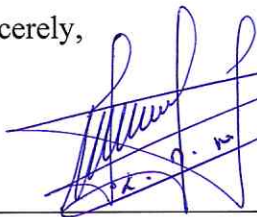

To reinforce the training of our students, we have been strenuously working on strengthening the industry-academia collaboration scheme. Normally, we work with professional private and public industries for real-world exposure to the working environment. The industrial attachment is an integral part of our curriculum where students apply industrial basics and connect dots with acquired knowledge;

To that end; we are humbly requesting your esteemed office for an industrial attachment vacancy in your institution/company for our final year students from Information Technology or Electronics and Telecommunication program. It is anticipated to take place from 31st July 2023 to 15th September 2023, a period of six (6) weeks.

In case of any need for clarification, please don't hesitate to contact our Industrial Liaison Specialist at mapaul2020@gmail.com or 0788274860.

Your assistance is highly appreciated and we look forward to your kind response at any time of your earliest convenience.

Sincerely,

Alexis MUHIRWA, PhD
Deputy Principal, Academics and Training
